Computer Science student at York University with hands-on experience in cybersecurity operations, IT infrastructure, and full-stack web development. Seeking on-campus work-study or tech roles to contribute technical skills and grow in a collaborative university environment.

EDUCATION

Honours BSc, Computer Science

Sep 2022 – Aug 2027

York University, Lassonde School of Engineering · Toronto, ON

- Lassonde Entrance Scholarship (2022)
- JEE Main 2021: All India Percentile of 97.9% among 1.5 million candidates

PROFESSIONAL EXPERIENCE

Senior Technical Student – Cybersecurity Operations

Sep 2025 – Present

Toronto Hydro · Co-op · Toronto, ON (Hybrid)

- Managed Identity & Access Management (IAM) including user provisioning and access reviews via BMC Remedy
- Conducted threat detection and SIEM log analysis (QRadar) to triage security events across critical energy infrastructure
- Developed PowerShell and Bash automation scripts to streamline security tasks and incident response workflows
- Supported PKI certificate lifecycle management and basic Azure cloud operations (VMs, storage, identity)
- Attended SecTor 2025 Cybersecurity Conference; engaged with Fortinet, Zscaler, Bell, Thales, and other industry leaders

Web & Digital Assistant (Work-Study)

Apr 2025 – Sep 2025

Lassonde School of Engineering, York University · Toronto, ON

- Maintained and updated university websites and event pages using WordPress CMS, extending functionality with custom HTML, CSS, and JavaScript for features not available out-of-the-box
- Designed and automated weekly Mailchimp email campaigns focusing on responsiveness and engagement
- Organized structured datasets for event logistics, scheduling, and outreach analytics
- Liaised with staff to gather technical requirements and ensure content accuracy across platforms

Mathematics & Programming Tutor

Sep 2023 – Apr 2025

Self-Employed · Toronto, ON (Hybrid)

- Provided tailored tutoring in high school math and university-level Java and Python to diverse student groups
- Developed structured learning plans and interactive problem-solving sessions, improving student outcomes

PROJECTS

York University Parking System

2025

- Built a Java-based parking system with JSON storage supporting 500+ simulated slots, using MVC and Singleton patterns
- Wrote 50+ test cases (automated + manual), reducing integration errors by 30%; produced full UML documentation

Stock Market Price Prediction – ML Model

2025

- Trained a sequential LSTM model (TensorFlow/Keras) on normalized yfinance data; achieved >50% next-day accuracy

Inventory Management System

2024

- Full-stack Java app for retail inventory tracking, order management, and low-stock alerts for 100+ SKUs
- Automated audit reports, cutting manual processing time by 40%

SKILLS

Programming: Python, Java, JavaScript, C#, .NET, Bash/PowerShell

Web & Frameworks: React, Next.js, Node.js, HTML/CSS, CMS tools, Mailchimp

Cybersecurity & IT: IAM, SIEM (QRadar), TRC, PKI/Certificates, Microsoft Azure, BMC Remedy, ServiceNow

Tools & Databases: Git, MySQL, MS Power BI, MS Office

Certifications: AI Coder: Claude Code & Coding Agents (Udemy, 2026) · Intro to AI & ML with Python (Udemy, 2026)

EXTRACURRICULAR

Tutor – Excel Lassonde Society, York University

2023 – 2025

- Delivered doubt-solving sessions in programming and math for first-year students; collaborated with executive team on tutoring strategy

Executive Team – Google Developer Club, York University

2024 – Present

- Helped design and deploy community-focused tools; streamlined event registration with Google Forms, cutting manual work by 50%
